ANOWER FERDOS

Aspiring Software Developer | C++ | Python | DSA | Backend
Learner | Problem Solver
Dhaka, Bangladesh

Summary

I am a 3rd-year Chemistry undergraduate who has developed a deep fascination for software development and problem-solving. I spend most of my time coding in C/C++ and Python, with a heavy focus on mastering Data Structures and Algorithms (DSA) and competitive programming. I love building things — turning ideas into real, functional solutions. Whether it's solving tough problems or creating creative projects, I'm driven by curiosity and the joy of making something meaningful. Right now, I'm bridging the gap between my science background and my goal of becoming a Software Developer.

Education

Dhaka College

Bachelor of Science, Chemistry · (2021)
